

7th Scottish Chromatin Group meeting

University of Glasgow, 9th June 2010

Jessica Tyler
Houston, USA

*Regulation of genomic processes by
chromatin assembly and disassembly*

Jane Mellor
Oxford

*Histone modifications, transcription factors,
ncRNA and gene loops in transcription*

Peter Fraser
Babraham

*Spatial transcription networks
between co-regulated genes*

Kevin Hiom
Dundee

*Ubiquitylation of histone H2A in chromatin:
what does it do?*

Kelly Chiang
Glasgow

*Defining the relationships between
histone modifications and gene splicing*

John Thomson
Edinburgh

*DNA Sequence at CpG islands influences
chromatin structure via Cfp1*

Starts at 10am - Charles Wilson Lecture Theatre

No registration required - Free lunch - Trade show

Researchers and students from across Scotland are welcome
